

RUJUL CHAUDHARI

Bloomington, IL | (630) 624-7859 | rujul489@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Cybersecurity Analyst with 4+ years securing payment processing and financial services environments. Delivered 40–50% reductions in security incidents through detection engineering, threat hunting, and automated threat detection. Deep expertise in PCI DSS, SOC 2, incident response, Splunk, Azure Sentinel, and cloud security (Azure, AWS). Pursuing CISM certification.

TECHNICAL SKILLS

Security Frameworks: PCI DSS | SOC 2 | NIST CSF | CIS Controls | Risk Assessment

Security Operations: Incident Response | Threat Detection | Threat Hunting | Detection Engineering | MTTR / MTTR

SIEM & Tools: Splunk | Azure Sentinel | Wazuh | KQL | Nessus | Microsoft Defender | Sophos

Cloud & Infrastructure: Microsoft Azure | AWS | Azure Entra ID | Active Directory | VPN | MFA

Scripting & Automation: PowerShell | Python | SQL | Incident Runbook Development

PROFESSIONAL EXPERIENCE

Security Analyst | Celero Commerce | Rosemont, IL

Aug 2022 – Present

- Reduced security incidents 40% by engineering detection rules in Splunk and Azure Sentinel, implementing encryption protocols, and tightening access controls across enterprise payment processing infrastructure.
- Achieved full PCI DSS and SOC 2 compliance by leading audit preparation, systematic gap analysis, and policy remediation across all control objectives.
- Led incident response investigations for high-severity threats, reducing MTTR and MTTR by coordinating cross-functional containment and deploying post-incident preventive controls.
- Cut enterprise attack surface by enforcing least-privilege access and quarterly access reviews, uncovering and remediating critical permission misconfigurations.

Cybersecurity Engineer | FortifyIT | Oak Brook, IL

Dec 2021 – Aug 2022

- Reduced client security incidents 50% across 15+ organizations by deploying MFA enterprise-wide, implementing end-to-end encryption, and establishing NIST-aligned RBAC.
- Decreased MTTR by 30% by authoring incident runbooks and automating alert triage; conducted threat hunting to proactively surface adversary activity before escalation.
- Identified and prioritized critical vulnerabilities on Windows Server using Nessus, applying CVSS scoring and business impact analysis to drive risk-ordered remediation.

Security Support Specialist | Unisys | Chicago, IL (Remote)

Apr 2021 – Dec 2021

- Maintained 95% customer satisfaction across 100+ security tickets by diagnosing authentication failures, access control misconfigurations, and endpoint protection issues via ServiceNow.
- Reduced ticket resolution time 25% by building a structured security knowledge base, accelerating Tier I/II incident response triage.

PROJECTS

Azure Sentinel Attack Map – Wrote 15+ custom KQL detection rules, integrated threat intelligence feeds, and built dashboards mapping attack patterns across global threat actors and multiple threat categories.

Nessus Vulnerability Management Lab – Assessed Windows Server instances, identified 30+ vulnerabilities across critical/high/medium severity, prioritized by CVSS score, and validated patch effectiveness in an isolated environment.

EDUCATION

B.S., Computer Science | DePaul University, Chicago, IL 2019

CERTIFICATIONS

ISACA CISM – In Progress (Expected 2026) | CompTIA CySA+ (Nov 2025) | CompTIA Security+ (Sep 2025) | SOC Fundamentals (Apr 2025)
